

# MASTER OF SCIENCE IN "PSYCHOLOGY"

# LEARNING OUTCOMES

#### By the end of the study programme the students will be able to:

- elucidate the major theories, research methods and approaches to inquiry and/or schools of
  practice in the student's field of study; articulate their sources and illustrate both their application
  and their relationship to psychology.
- disaggregate, adapt, reformulate and employ principal ideas, techniques, or methods at the forefront of psychology in the context of a written product or project.
- provide adequate evidence (through papers, projects, notebooks, computer files or catalogues) of contributing to, expanding, assessing, and/or refining knowledge in psychology.
- apply the ethical framework(s) appropriate to psychology.
- employ the tools, concepts, and methods appropriate to their inquiry in a project, paper or performance.

#### PROFILE: CLINICAL PSYCHOLOGY

- demonstrate effective competences on processes relevant to normal thought, feelings and behaviour.
- demonstrate knowledge of identifying scientific inquiry into social, developmental, cognitive and physiological phenomena.

### **PROFILE: SCHOOL PSYCHOLOGY**

- demonstrate appropriate knowledge of historical, political and educational laws, policies, and procedures that affect public education.
- demonstrate the sensitivity and skills needed to work with individuals of diverse backgrounds and developmental abilities, and to implement strategies selected or adapted based on individual characteristics, strengths, and needs.

#### **PROFILE: COUNSELING PSYCHOLOGY**

- demonstrate effective competences to behavioral counseling focuses on helping individuals identify negative behavioral patterns such as substance abuse.
- demonstrate knowledge of identifying symptoms, traits, and patterns in children who struggle with developmental and psychological disorders.
